Selected Web Projects 2024-2025

Web design, development and automation done right.

Who We Are

Enchoframe Agency builds fast, modern, and reliable websites that perform.

We specialize in clean design, seamless mobile responsiveness, and scalable architecture tailored for brands, professionals, and startups.

Our projects combine usability, speed, storytelling and crafted for visual impact and conversion.

Beyond websites, we design and develop custom web and mobile applications, automation systems, and interactive digital experiences that help businesses scale.

From concept to deployment, we handle every stage with precision, ensuring each product is intuitive, functional, and future-proof.

Our approach blends technical expertise with creative vision, enabling us to deliver solutions that not only look great but also drive measurable results.

What We Do

Web design and development:

- Custom responsive websites built with HTML, CSS, and JavaScript or frameworks like Astro and React
- Landing pages for startups or products
- Portfolio, business, or e-commerce sites
- Website redesigns including modernization, speed, and mobile optimization
- Accessibility and performance optimization aligned with WCAG and Core Web Vitals

App design and development:

- Cross platform mobile and web apps built with modern frameworks such as Flutter
- User centered interface design focused on simplicity and speed across devices
- End-to-end development including prototyping, backend integration, and deployment to App Store or Google Play.

SEO and visibility:

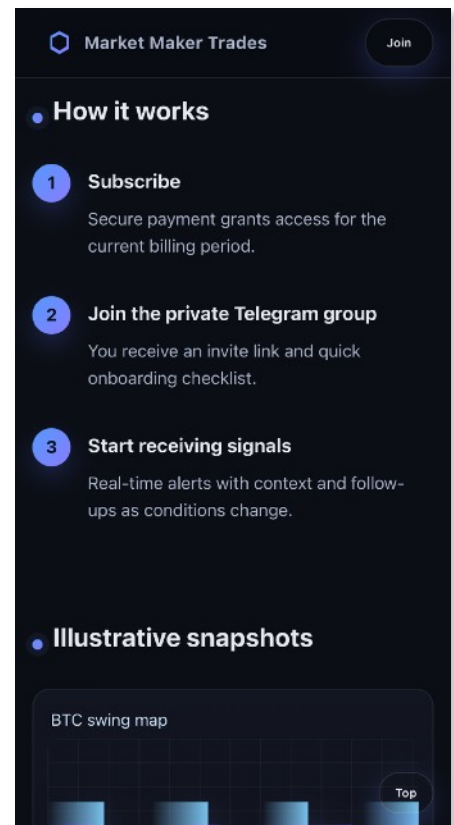

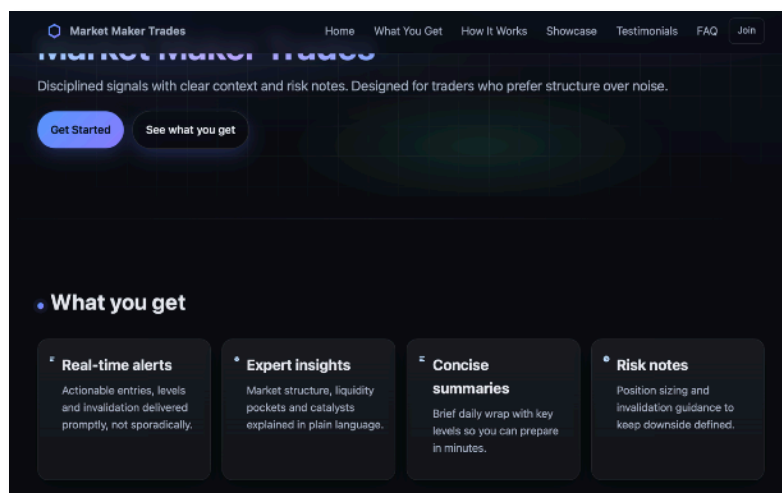

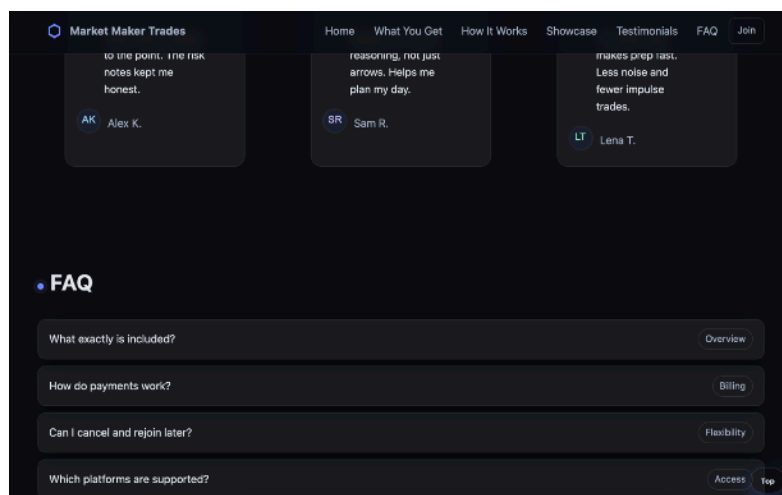

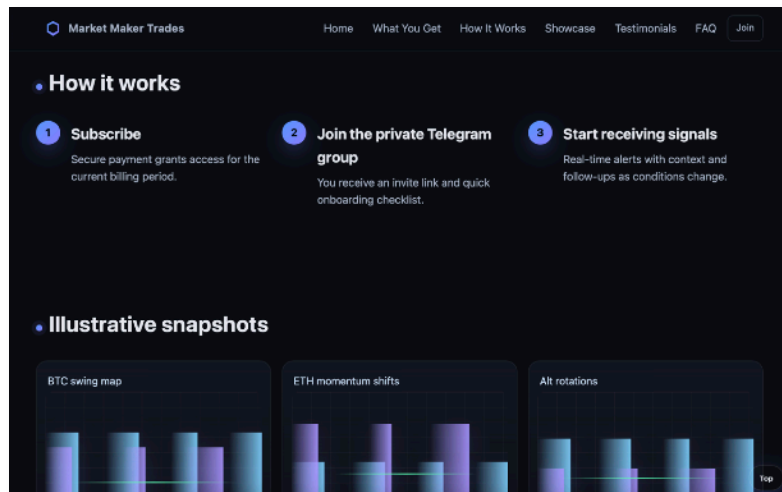

- On-page SEO including meta tags, alt text, headings, and structured data
- Technical SEO including speed, mobile, sitemap, SSL, and indexing
- Local SEO setup including Google Business Profile and Maps ranking
- Keyword optimization and basic content strategy
- SEO reports and performance tracking
- Help your business get discovered through smart SEO strategies that improve rankings, visibility, and site performance

Maintenance and support:

- Keep your website secure, fast, and up to date with ongoing monitoring, backups, and content updates
- Our support ensures everything runs smoothly so you can focus on your business, not your website
- Monthly updates and backups
- Security monitoring and uptime checks
- Content updates including text, photos, and products
- Hosting and domain support

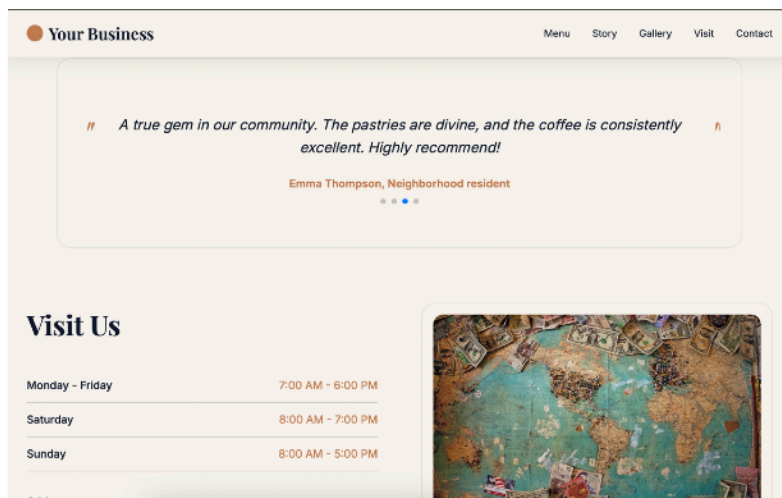

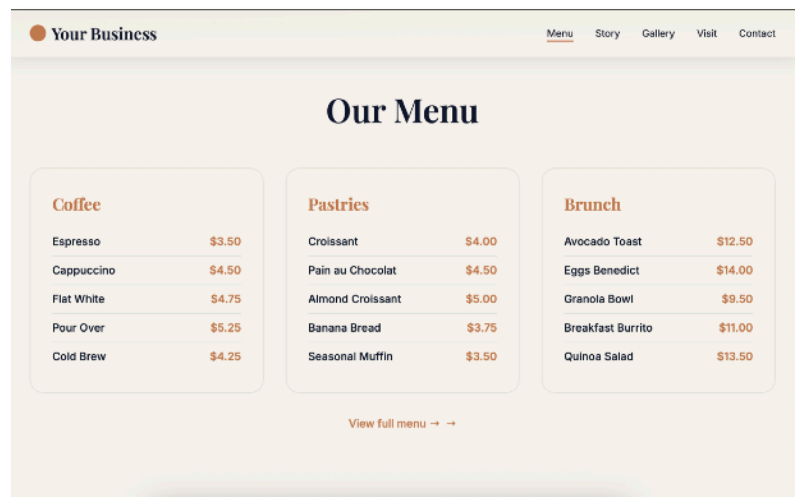

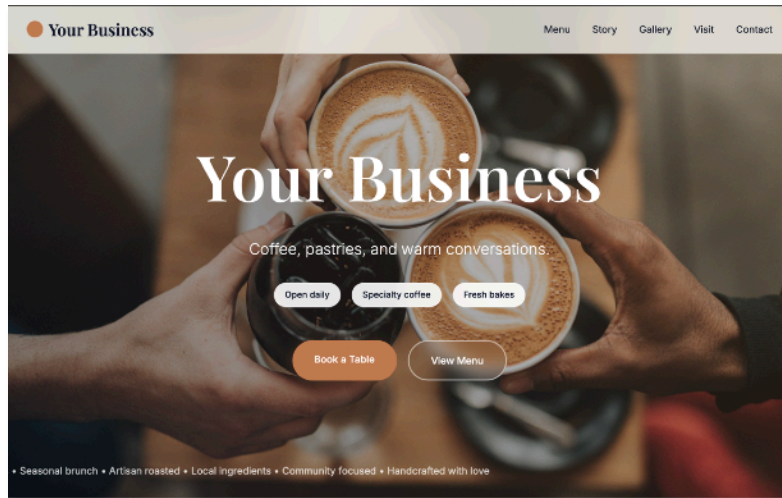

Consistency Across Devices

Each site we build is optimized for both desktop and mobile. Layouts adapt to user context, maintaining brand experience and clarity regardless of screen size.

Warm Café Brand Site

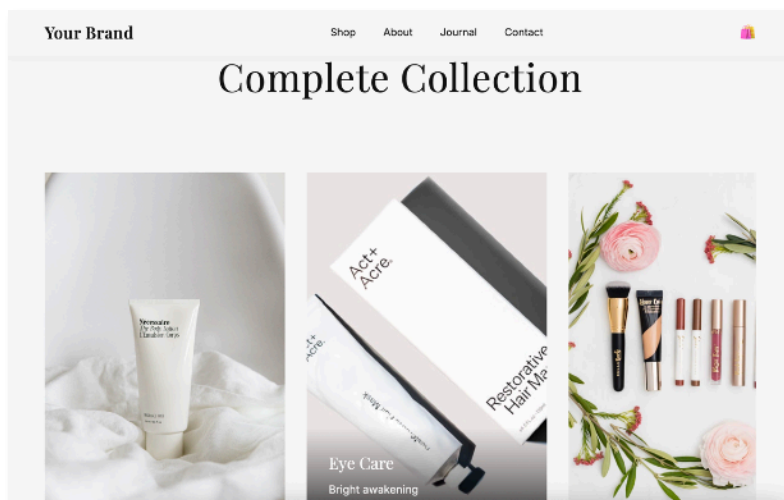

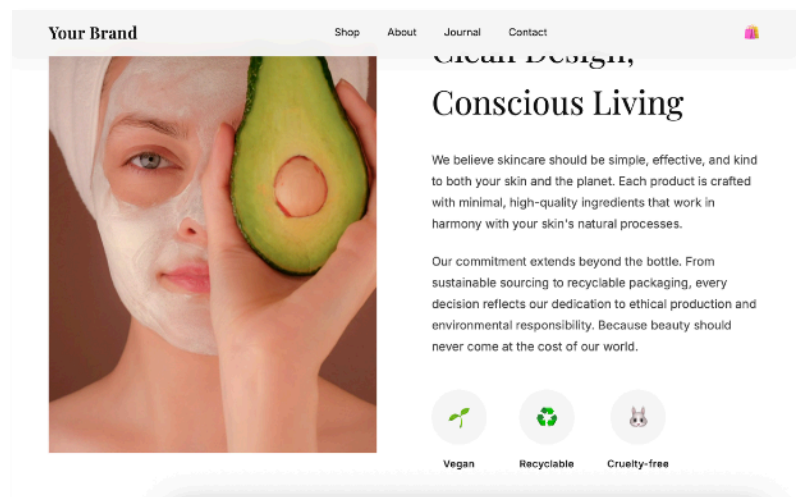

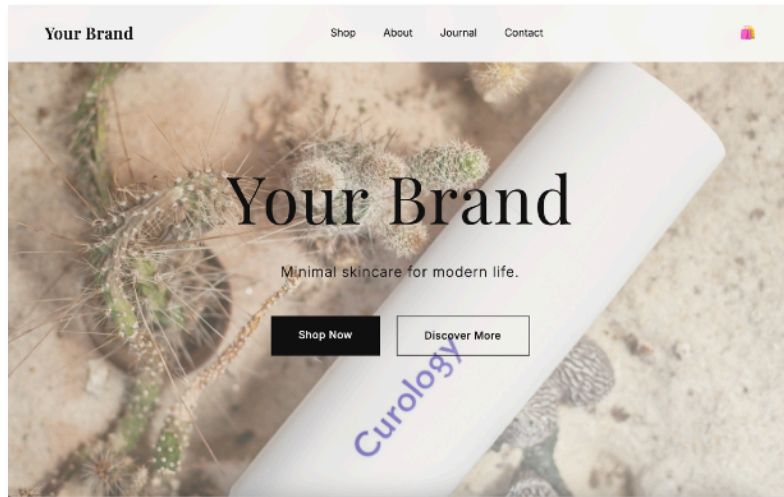

Photography-first layout with editorial typography, cozy atmosphere, and elegant storytelling.

Focus: atmosphere, storytelling, and brand feel.

Minimal Product Brand

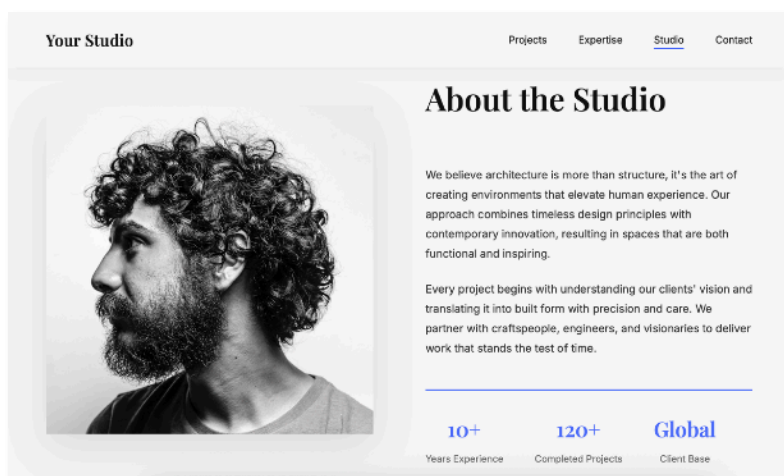

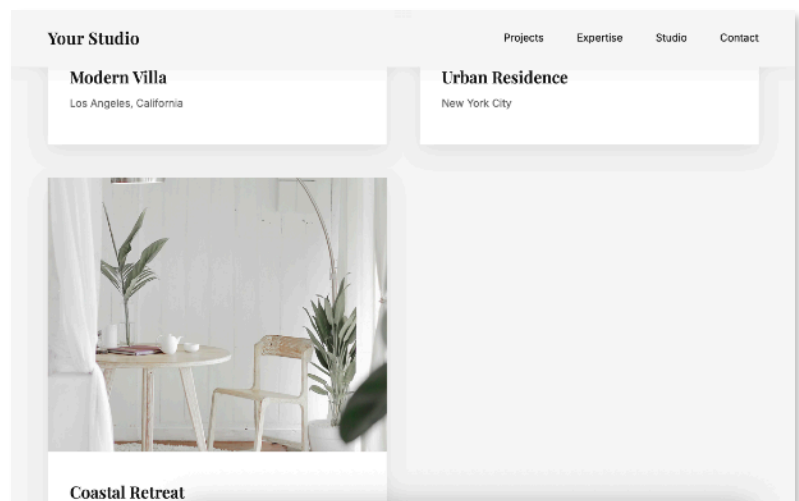

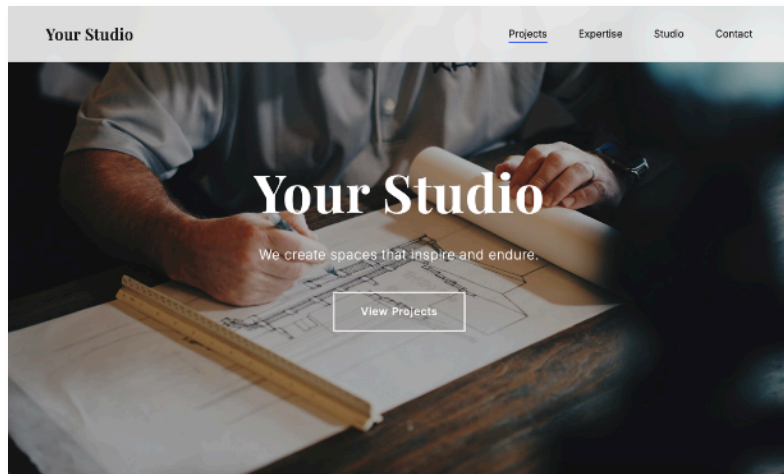

Clean product grid, elegant typography, and conversion-ready layouts.

Focus: clarity, pace of exploration, and checkout flow.

Architecture Portfolio

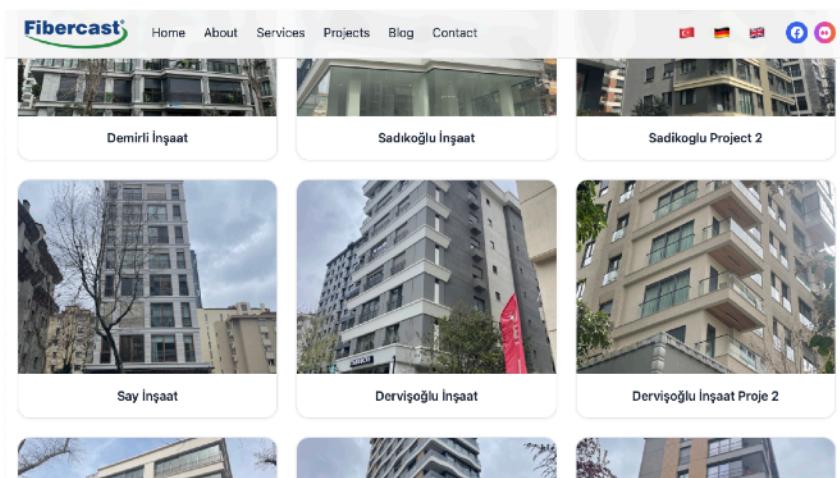

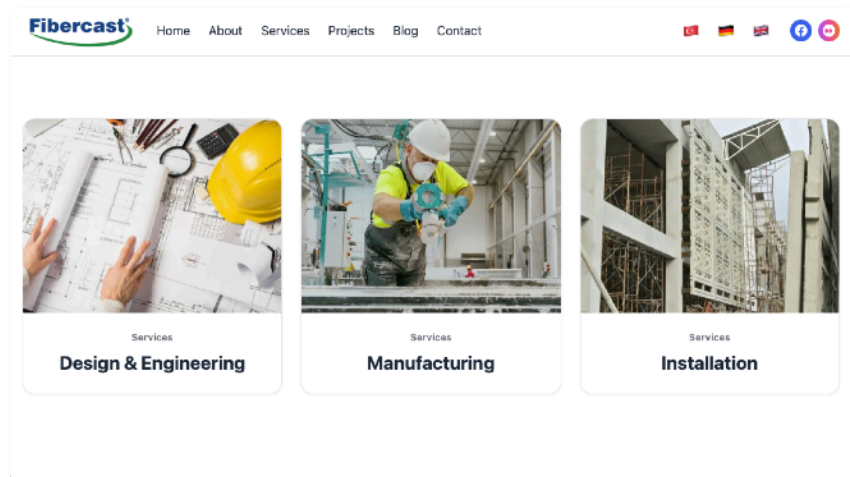

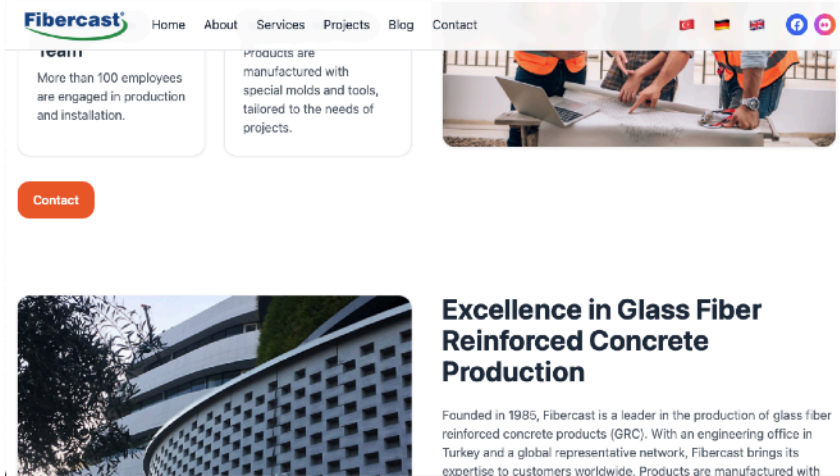

Structured, trustworthy design system with project showcases and confident typography.

Focus: credibility, structure, and calm presentation.

Fibercast Industrial Website

A multilingual, modern corporate site for Fibercast, a precast construction company. Designed with a neutral palette, bold typography, and clear product segmentation across three languages (English, Turkish, German).

Focus: performance, accessibility, and international scalability.
